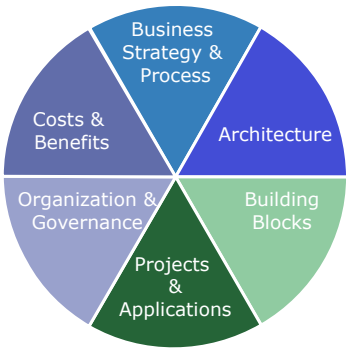
1. SOA

SOA - Framework for Business / IT Alignment

SOA



[Source: BEA 2005]

- BEA-Oracle Domain Model
  - Business strategy & process
  - Costs & benefits
  - Architecture
  - Organization & governance
  - Projects & applications
  - Building Blocks

Business

IT

(c) EPFL, 2009

Gartner – SOA's Impact

- **Time to market** reduced
- **Business processes** improved efficiency, high visibility, w/o paper
- **Administrative costs** reduction

- **Service-level** improved effectiveness
- **Project** cycles faster

- **Implementation** quicker
- T**otal cost of application** reduction

Business

IT

[Source: http://blogs.techrepublic.com.com/programming-and-development/?p=1292]

SOA's Technologies

- BPEL
- BPEL4People
- SCA
- SOAP
- WS-Addressing
- WSDL
- WS-I
- WSIF
- WS-Security
- XPath
- XQuery
- XSLT

[Source: http://www.oracle.com/technology/tech/soa/index.html]

(c) EPFL, 2009

EPFL

2. ITIL

ITSMF – ITIL's Impact

- **customer satisfaction** improved
  through services delivery
- **productivity improved**
- **costs** reduced
- **IT services** through the use of proven best practice processes (one of them Service Level Management)
- **skills and experience** better used
  standards and guidance
- **third party services** improved delivery

Business

IT

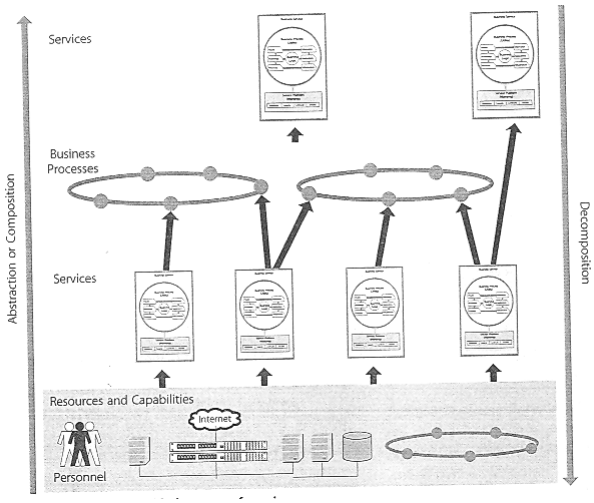
ITIL's Embedded Services

Services to customers →

Business processes →

Services to business processes →

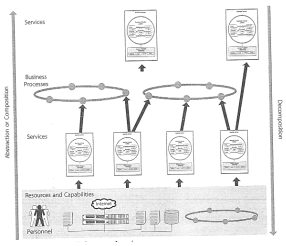
Applications →



[ITIL v3, Service Strategy, p. 124]

Challenges

- SOA / ITIL from technology to business impact
- SOA / ITIL hierarchy of services (from applications to customers)



→ **Business and IT people have to collaborate !**

→ **IT Development and IT Operation have to collaborate !**

(c) EPFL, 2009

ÉCOLE POLYTECHNIQUE FÉDÉRALE DE LAUSANNE

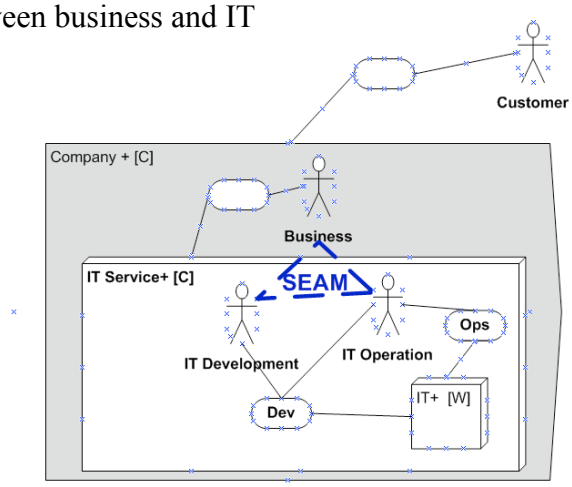
3. SEAM

11

SEAM

(Systemic Enterprise Architecture Methodology)

- SEAM - Communication tool to support collaboration between business and IT



12

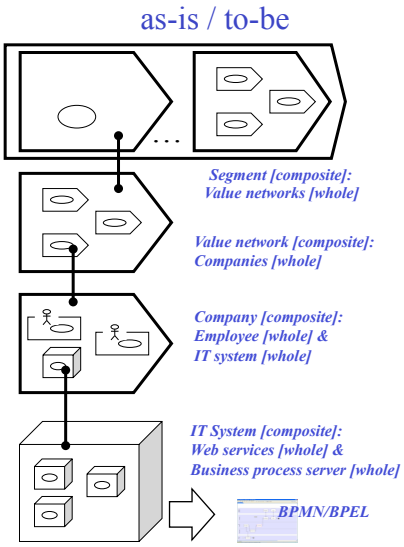
SEAM Method

- Hierarchical approach (from business to IT)

- Goal model
- Service model
- Process model

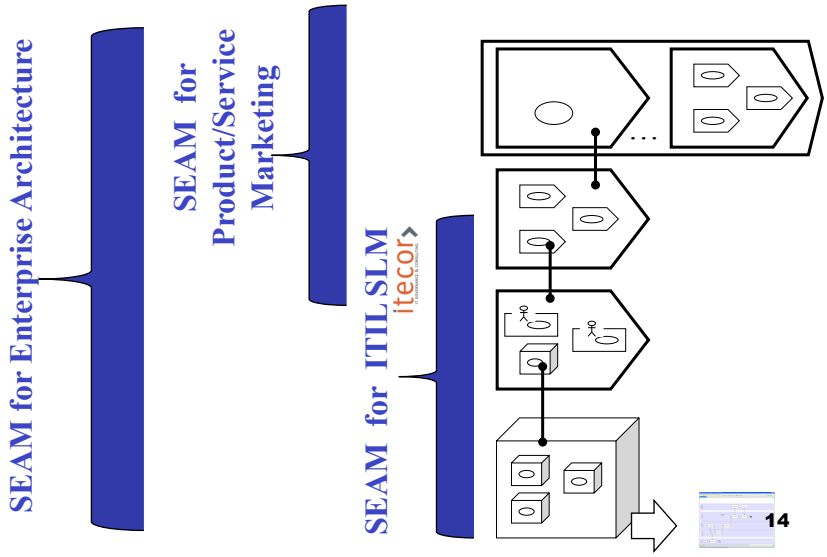
- Based on **system thinking** and on ISO/IEC & ITU **RM-ODP**

http://lams.epfl.ch/reference/seam



13

SEAM Versions



14

SEAM Workshops

SEAM Contributors

- Prof. Alain Wegmann (group director, 1997 - ...)
- Gil Regev (adjoint 1997 - ... , PhD 2003, 50% EPFL / 50% Itecor),

- Irina Rychkova (PhD 2008)
- Lam-Son Lê (PhD 2008)
- José Diego de la Cruz (PhD 2007)
- Pavel Balabko (PhD 2005)
- Otto Preiss (PhD 2004)
- Andrey Naumenko (PhD 2002)

- Industrial parnters itecor
- Academic partners
- Olivier Perroud (SEAM association - www.seam.ch)

(c) EPFL, 2009

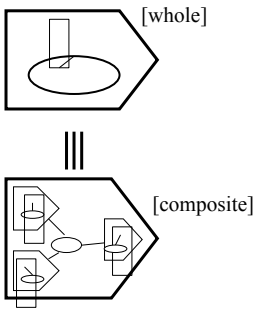
4. SEAM Example

17

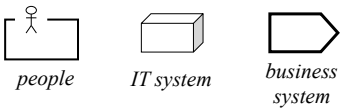
SEAM Notation

- Systems are specified:
  - by their **behavior**
    (black-box, system as a whole),

    <u>et</u>
  - by their **construction**
    (white box, system as a composite)

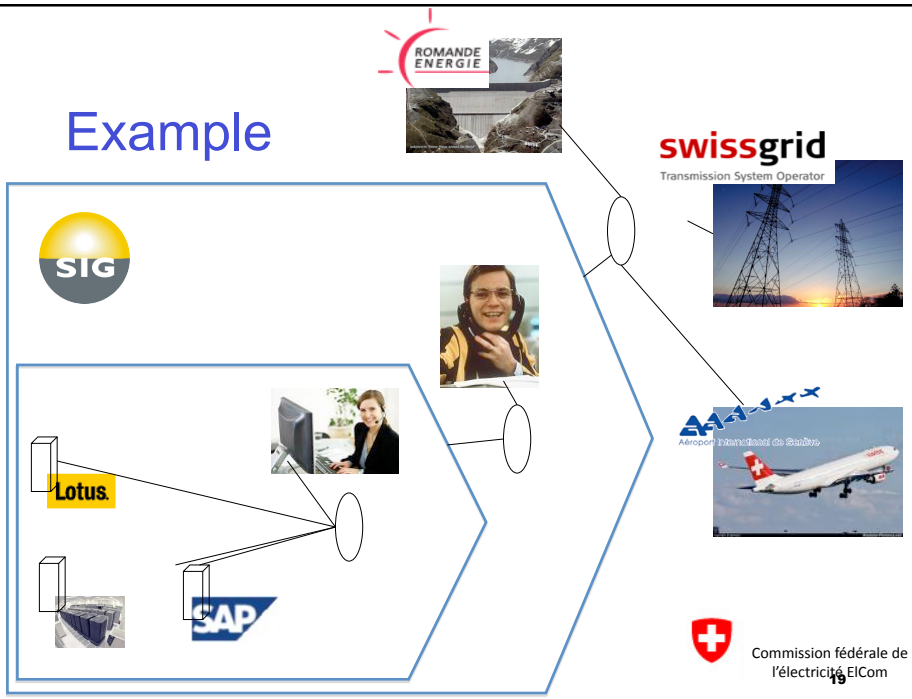


- The pictogram describes the nature of the system.



18

Example

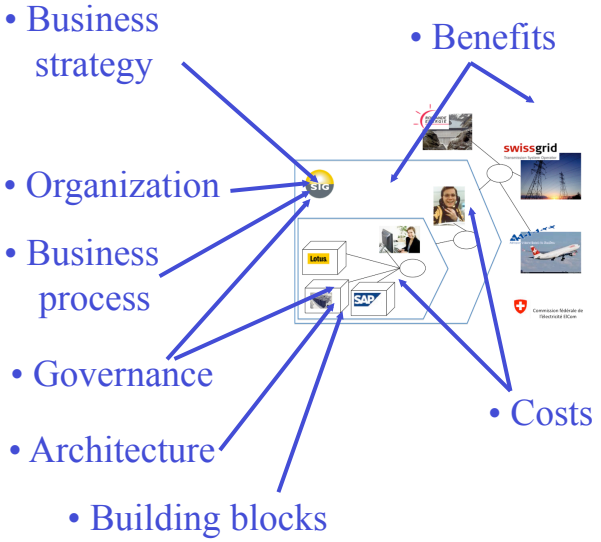


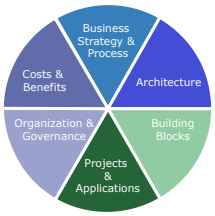
19

5. Conclusion

20

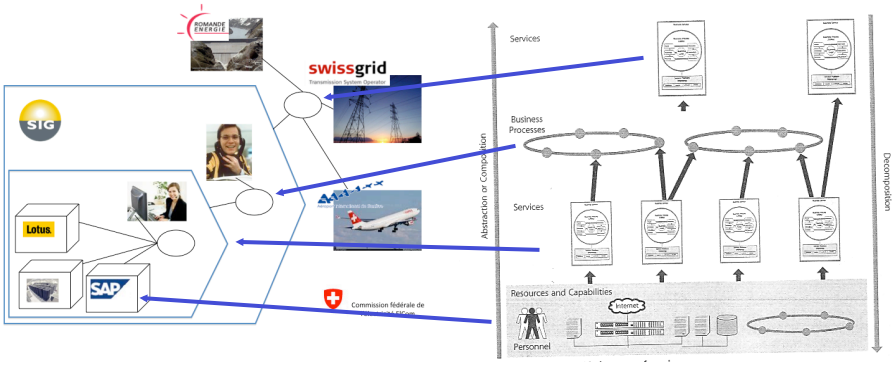
(BEA-Oracle) SOA / SEAM Mapping





21

ITIL / SEAM Mapping



22

Systems and Services

Business Services by VN
(value network to partners)

Services by Company
(company to partners in value network)

SOA Services by IT
(IT to business process)

IT Services by Application
(application to IT service)
